

## June HeatSmart Open Houses

Greetings from the HeatSmart team!

Local homeowners who have heat pumps have kindly volunteered to open up their homes to visitors this month. If you are thinking about getting a heat pump as part of the Hudson-Stow HeatSmart program, this is a good chance to see them in action.

You will get to see the equipment – indoors and out - which helps to envision how it might look in your home. You can see and hear for yourself how heat pumps work, and get your questions answered from the homeowner.

A member of our HeatSmart Hudson-Stow team will also be on hand with further information about how these new high-efficiency heating and cooling technologies can help you save money, improve home comfort, and reduce your carbon emissions.

We will have four open houses for air source and ground source heat pumps during the next three June weekends. Residents from both Hudson and Stow are welcome to attend any of the open houses. Please see our “events” information and sign up, by visiting our website here: <http://wepowr.com/heatsmarths/open-houses>

HeatSmart Hudson-Stow is a community-led green initiative promoting air source and ground source (geothermal) heat pumps. The program and our special offer will run until the end of the year.
